PROFESSIONAL SUMMARY

Senior Game Developer with 12+ years of experience in games and simulations. Worked on web and mobile application developments and third party integrations as well. Specialized in architecting scalable mobile games multiplayer game systems, and simulations and games with good knowledge of system design both in HLD and LLD. Proven track record of leading client-side architecture, mentoring juniors, and delivering live production systems with strong user engagement. Adept at collaborating across backend, product, and DevOps teams to drive end-to-end delivery.

CORE SKILLS

- Game Development: Unity Game Engine, LiveOps, Optimizations, AR/VR
- Programming: C#, .NET, Xamarin, ASP.NET, Java Spring Boot, Python(Basic) and Rust(Basic), HTML and CSS
- Backend Systems: Real-time sync, Socket communication modules, REST APIs & Remote Configurations
- DevOps & CI/CD: Jenkins & GitHub Actions
- Version Control: Git, Mercurial & Subversion
- Databases: MySQL, Postgres, MongoDB & SQL Server
- QA and Collaboration Tools: Jira, Redmine, Asana &Slack
- Creative Tools: Photoshop, GIMP, Davinci Resolve & Blender
- Other Tools: Postman, Isomnia, Ngrok
- AI Tools: Claude Code, Codex, Unity MCP and CLI, Mermaid

PROFESSIONAL EXPERIENCE

Senior Unity Developer
DynamicNext, Kochi | 2021 – Present

Main Project: *Downtown Gangstaz* (Live on Google Play and iOS AppStore)
https://play.google.com/store/apps/details?id=com.dn.games.gangstaz&hl=en_IN

- Own and drive client-side architecture for a global RTS multiplayer game.
- Created AR variants of the game for developer conference exhibitions.
- Worked on XR based Metaverse concept of the game.
- Contributed to a live RTS multiplayer game with 1M+ userbase and strong Play Store ratings
- Lead development of core gameplay systems, combat mechanics, and performance optimization
- Built a data-driven configuration framework enabling designers to modify gameplay without engineering dependency
- Optimized performance across a wide range of Android devices, improving runtime efficiency and stability
- Partner with DevOps to design and implement automated build and release pipelines
- Establish and maintain modular, reusable architecture across shared products
- Drive technical decision-making for gameplay systems and client architecture
- Mentor developers, conduct code reviews, and guide implementation decisions
- Lead technical discussions and feature planning with cross-functional stakeholders
- Support live operations, feature rollouts, and continuous updates in a production environment

Senior Unity Developer
Games2Win, Mumbai (Remote) | 2020 – 2021
Main Project: *International Fashion Stylist* (Live on Google Play & iOS AppStore)
https://play.google.com/store/apps/details?id=air.com.games2win.internationalfashionstylist&hl=en_IN

- Contributed to a high-scale live mobile game with a global player base and continuous content updates
- Delivered frequent feature releases and live events as part of a live-ops driven development cycle
- Collaborated with Analytics, AdOps, Product, and QA teams to improve engagement and monetization
- Played a key role in maintaining production stability and rapid iteration cycles
- Participated in agile planning, sprint execution, and cross-team coordination

---

Associate Technical Lead
MicroObjects, Kochi | 2012 – 2020

- Created enterprise applications for kids, AR games and simulations.
- Worked on Google Cardboard based VR demonstrations.
- Created a marker based AR simulation for a Horror house.
- Led development of multiple mobile games and gamified applications across diverse genres
- Built cross-platform applications using Xamarin Forms
- Mentored team members, conducted code reviews, and supported onboarding
- Delivered end-to-end solutions from estimation → concept → production → maintenance

Software Engineer (Associate 2)
Ernst & Young, Trivandrum | 2010 – 2012

- Developed enterprise-grade web applications and BI tools using ASP.NET and SQL Server
- Built reusable components and supported rapid prototyping (POCs)
- Collaborated with business and technical teams to deliver internal solutions

KEY ACHIEVEMENTS

- Contributed to revenue growth through faster feature delivery and improved update cycles.
- Participated in data analysis and provided key insights for the market trends via research and experiments.
- Recognized for technical leadership and consistent high-quality delivery .
- Successfully executed onsite deployments and client demonstrations.
- Demonstrated adaptability across multiple technologies and domains.

EDUCATION

Bachelor of Technology in Computer Science
College of Engineering, CUSAT, India
